

Excellence in illuminating clinical care begins with precision at the millimeter level

An Ideal Surgical Light:

- **Accurately reproduces the natural colors and subtle differences in tissue**, enabling veterinarians to make precise clinical decisions and perform safe, meticulous procedures.
- **Provides homogeneity and stable illumination**, reduces the need for frequent light adjustments that may interfere with surgical workflow.
- **Reduces eye fatigue**, promoting surgeons’ eye health to assist in focused and composed high-intensity cases.
- **Adjusts brightness transitions in accordance with visual physiology**, reducing discomfort in animals caused by sudden exposure to intense light.

Exceptional Illumination Eye-friendly Comfort

High Performance & Low Fatigue

Superior color rendering and illumination performance
Reduces visual fatigue during prolonged surgical procedures

Multi-patch Superposition Technology (MPST)

- Delivers consistently uniform and circular light across the surgical field
- Maintains stable illumination even when part of the light source is obstructed

Electronic Focusing

- Inner and outer ring beams converge at 0.8–1.2 m without dispersion
- Reduces need for frequent light adjustments, allowing surgeons to stay focused on procedures

Adjustable Light Field Diameter

- Light field diameter adjustable from 170 to 250mm
- Designed to suit a wide range of surgical cases - from fine incisions to broad operative fields

Stable Articulation & Freely Suspended Positioning

- Maintains precise positioning without drifting or sagging over long-term use
- Enables fast and stable angle and position adjustments during surgery

Dual-Function Handle

- Optional control handle integrates both positioning and brightness adjustment
- Enhances surgical efficiency and workflow fluidity

Endo Mode

- Provides soft, low-illuminance lighting optimized for endoscopic procedures
- Prevents screen glare and maintains a clear visual field

Single-handed operation Full-room flexibility

Integrated Lamp Head

- Screw-free
- Antimicrobial coating
- Effortless routine care

Compact Agility Powerful Functionality

Ceiling Height Adaptability

- Engineered to suit ceiling heights as low as 2.4 meters
- Ensures a professional, efficient surgical layout even in compact veterinary settings

Compact Space Solution

- Specifically designed for veterinary clinics with limited space
- Easily fits into surgical areas as small as 5 m², offering flexible and functional installation

A 5 m² surgical area is one that is specifically configured to support a rotational radius of 1.7 meters

Crafted to Perfection Trusted Quality

- Rigorously tested under extreme conditions to last over 10 years of reliable performance
